Research focus: need discovery in human-AI communication — how people discover and clarify what they need through iterative interaction with AI; how creators and platforms mediate the path from AI capability to everyday adoption. AI adoption is a communication problem.

EDUCATION

University of Southern California, Los Angeles, CA

Expected Dec 2026

MAT-TESOL Candidate, USC Rossier School of Education — Expected December 2026 — GPA: 4.0/4.0

Nanjing University of Posts and Telecommunications, Nanjing, China

Jun 2020

B.A., English — Average: 88.5/100

Shih Hsin University, Taipei, Taiwan

Sep 2017 – Jan 2018

Exchange student, Department of Communications — ranked 3rd in department

RESEARCH INTERESTS

Need discovery and articulation in human-AI interaction (information behavior: Taylor's question negotiation, Belkin's anomalous state of knowledge); creator-mediated technology adoption; communication infrastructures of AI diffusion; human agency when AI participates in defining the need; trust and mental models of AI.

RESEARCH IN PROGRESS

Xiong, S. (manuscript in preparation). *Looking Inward Through the Machine: A Field Study of Need Discovery in Creator-Mediated AI Adoption*. Sole-authored field study of creator-scaffolded need discovery. Research design: practice-based field study using the author's bilingual AI creator video corpus on Douyin (3.2M+ views, with audience comment and backend data) as the deep case alongside a comparative sample of AI creators, investigating (1) how people discover and clarify needs through iterative human-AI interaction, (2) what creators scaffold — tool knowledge, copied prompts, or reflective self-clarification — and (3) how need discovery becomes sustained adoption.

RESEARCH EXPERIENCE

Co-Founder & Marketing Lead, AI Markethon — A Field Testbed for AI Adoption

2026 –

Present

Los Angeles, CA (markethon.us)

- Co-founded a 24-hour marketing competition (LA TechWeek, Oct 14–15, 2026; 50–100 selected builders, marketers, and creators; \$13,000 prize pool) as a live field site for observing how AI

- capabilities are translated into stories, demos, and workflows that ordinary users can understand.
- The competition compresses months of go-to-market into a day, making the communication work of adoption visible and observable: how a model becomes a story, what kind of demo makes a stranger say “I need that.”

Independent Fieldwork — Bilingual AI Creator 2024 – Present

- Douyin, Xiaohongshu, TikTok (Chinese-language creator account, 600,000+ followers)
- 43 AI-related videos since May 2026 (~10 sponsored AI product collaborations; 12-video series on AI agents); 3.2M+ total views, ~138K engagements.
 - Practice-based empirical base for doctoral research: systematic observation of how AI capabilities are framed, interpreted, and taken up by non-technical audiences, with audience comment and backend data.
 - Commercial partnerships with AI product teams (e.g., Doubao, Qwen) promoting agent products — market-side knowledge of feature education and demand formation for AI reaching ordinary users via social media.

PROFESSIONAL EXPERIENCE

Key Account and Project Manager — Hangzhou Duomai E-commerce Co., Ltd., Hangzhou, China Apr 2022 – Dec 2023

- Led brand promotion campaigns for global clients (Lancôme, Boots UK, Nestlé, G-III); managed cross-functional teams of 20+; KOL campaign planning and paid media strategy on Chinese platforms.

Executive Director — Zhejiang Xingyi Culture (EASE), Hangzhou, China Apr 2021 – Mar 2022

- Co-developed an e-commerce livestreaming talent program with a partner university; managed a team of 78.

TEACHING EXPERIENCE

Clinical Practice Intern — USC Rossier School of Education, Los Angeles, CA 2025 – Present

- Delivered communication-skills instruction to STEM majors (one semester); current semester: GRE-related clinical practice.

IELTS Speaking Instructor — Hangzhou EASE International Education Co., Ltd., Hangzhou, China Aug 2024 – Present

- Teach IELTS speaking courses to 50+ students; developed an AI-integrated speaking curriculum; assisted in testing an AI-driven spoken English practice tool (pronunciation grading, user-experience feedback).

HONORS AND AWARDS

Annual Education Influencer Award — Douyin	2024
Top Agency Partner of the Year — Duomai	2023
First Prize, Jiangsu University Student Art Exhibition	2017
School Scholarship and Outstanding Student Leader — NJUPT	2016

RESEARCH AND TECHNICAL SKILLS

- Methods in training: qualitative fieldwork, systematic content analysis, thematic analysis; descriptive statistics.
- Languages: Mandarin Chinese (native); English (fluent — IELTS 7.0).
- Technical: Microsoft Office Suite, CapCut, Xmind, AI-assisted content and research workflows.
- AI agents: deep, daily hands-on user across major platforms — research, content production, and workflow automation.
